Arista Networks® OSFP-400G-PLR4 Compatible TAA 400GBase-PLR4 OSFP Transceiver (SMF, 1310nm, 10km, MPO, DOM, CMIS 4.0)

### Product Description

This Arista Networks® OSFP-400G-PLR4 compatible OSFP transceiver provides 400GBase-PLR4 throughput up to 10km over single-mode fiber (SMF) using a wavelength of 1310nm via an MPO connector. It is guaranteed to be 100% compatible with the equivalent Arista Networks® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

Skylane's transceivers are RoHS compliant and lead-free.

### Features:

- OSFP MSA Compliant
- Supports up to 425Gbps
- 400GAUI-8 Interface Compliance Defined by IEEE802.3bs
- Single-Mode Fiber
- MPO-12 Connector
- 8x53.125Gbps (PAM4) Electrical Interface
- CMIS 4.0 or Later
- PIN and TIA Array on Receiver Side
- Hot Pluggable
- Commercial Temperature 0 to 70 Celsius
- Metal with Lower EMI
- RoHS Compliant and Lead-Free

### Applications:

- 400GBase Ethernet

---

*For your product safety, please read the following information carefully before any manipulation of the transceiver:*

#### **ESD**

*This transceiver is specified as ESD threshold 1kV for SFI pins and 2kV for all others electrical input pins, tested per MIL-STD-883G, Method 3015.4 / JEESD22-A114-A (HBM). However, normal ESD precautions are still required during the handling of this module.*

#### **LASER SAFETY**

*This is a Class1 Laser Product according to IEC 60825-1:2007. This product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated (June 24, 2007).*

*The optical ports of the module need to be terminated with an optical connector or with a dust plug in order to avoid contamination.*

## Absolute Maximum Ratings

Parameter	Symbol	Min.	Typ.	Max.	Unit	Notes
Power Supply Voltage	V <sub>cc</sub>	-0.5	3.3	3.6	V	
Storage Temperature	T <sub>stg</sub>	-40		85	°C	
Operating Case Temperature	T <sub>c</sub>	0		70	°C	1
Relative Humidity	RH	5		55	%	
Operating Relative Humidity	RH			65	%	
Power Dissipation	P <sub>DISS</sub>			10	W	

### Notes:

1. The position of the case temperature measurement is shown in the Mechanical Specifications section.
2. Exceeding the Absolute Maximum Ratings table may cause permanent damage to the device. This is just an emphasized rating and does not involve the functional operation of the device that exceeds the specifications of this technical specification under these or other conditions. Long-term operation under Absolute Maximum Ratings will affect the reliability of the device.

**Notes:**

1. Power Supply Noise is defined as the peak-to-peak noise amplitude over the frequency range at the host supply side of the recommended power supply filter with the module and recommended filter in place. Voltage levels including peak-to-peak noise are limited to the recommended operating range of the associated power supply.
2. 400GAUI-8 operation with host-generated FEC. The transmitter must receive pre-coded FEC signals from the host ASIC.
3. This is the maximum voltage that can be applied across the differential inputs without damaging the input circuitry. The damage threshold of the module input shall be at least 1600mV peak-to-peak differential.
4. Per IEEE 802.3bm specification.
5. DC Common-Mode Voltage is generated by the host. Specification includes the effects of ground offset voltage.
6. Per IEEE 802.3bs specification.
7. Module Stressed Input Tolerance is measured using the procedure defined in 120E-3.4.1.

### Notes:

- 400G LR8 operation with host-generated FEC. The transmitter must receive pre-coded FEC signals from the host ASIC.

2. 9 $\mu$ m SMF. The maximum link distance is based on an allocation of 1dB of attenuation and 3dB total connection and splice loss. The loss of a single connection shall not exceed 0.5dB.
3. Average launch power, per lane (minimum), is informative and not the principal indicator of signal strength. A transmitter with launch power below this value cannot be compliant; however, a value above this does not ensure compliance.
4. Receiver sensitivity, @<4.6dBm, for Tx with TDECQ<1.4dB; @<SECQ-6, for Tx with 3.4dB $\ge$ TDECQ $\ge$ 1.4dB.

**Notes:**

1. OSFP uses common ground (GND) for all signals and supply (power). All are common within the OSFP module, and all module voltages are referenced to this potential unless otherwise noted.
2. Open-drain with pull-up resistor on the host.

## Recommended Host Board Power Supply Filter

## Transceiver Block Diagram

### Notes:

1. The optical transmitter portion of the transceiver incorporates a 4x100Gbps 400GAUI-8 electrical input with Equalization (EQ) block, integrated electrical multiplexer, EML laser driver, diagnostic monitors, control and bias for the four EA modulator and single-mode laser source.
2. The optical receiver portion of the transceiver incorporates two optical de-multiplexers, eight PIN photodiodes, trans-impedance amplifiers (TIA), integrated de-multiplexer, and 4x100G 400GAUI-8 compliant electrical output blocks.

### Application Reference Diagram

### Notes:

1. The interface between the OSFP module and an ASIC/SerDes is shown above. The high-speed signal lines are internally AC coupled, and the electrical inputs are internally terminated to 100Ω differential. All transmitter and receiver electrical channels are compliant to module 400GAUI-8 specifications per IEEE 802.3bs.

## Mechanical Specifications

### Notes:

1. All dimensions are in mm.
2. For safety and protection of the host system, the power to each OSFP module may be protected by an electronic circuit breaker on the host board which is enabled with the H\_PRSn signal such that power is only enabled when the module is fully engaged into the OSFP connector.

### Case Temperature Measurement Point

### Notes:

1. All dimensions are in mm.

**Notes:**

- 1. The optical interface port is an MPO-12 connector.

# About Skylane Optics

Skylane is a leading provider of transceivers for optical communication.

We offer an extensive portfolio for the enterprise, access, datacenter and metropolitan fiber optical market as well as for smart home applications and home networks.

We cover the European, South American and North American market with a strong partner network and have offices in Belgium, Brazil, Sweden and USA.

Our offerings are characterized by high quality and performance. In combination with our strong technical support, we enable our customers to build cost optimized network solutions.

We offer an extensive range of high-quality products including transceivers (Optical and copper), Active Optical Cable (AOC), Direct Attach Cable (DAC), Mux/Demux, Coding Box (SKYGATE).
